ACHIEVEMENTS

Diagnosed and implemented hardware and software solutions for thousands of individual and business clients both on location and in shop for LAN side networks.

Designed, built and integrated computer networks for 50+ small and medium companies. Used key technologies such as routers, gateways, switches, cat5e, cat6, TCP/IP, SMTP, POP3, Ethernet, frame relay, ADSL/SDSL/IDSL and other standard network technologies.

Effectively upgraded and deployed home and professional editions of Windows versions such as 3.xx, 95, 98, NT, XP, Vista, and even Linux and Macintosh.

Installed and maintained Windows Servers such as Windows NT, 2000, 2003 Server and for approximately 20 small sized business networks.

Installed, maintained and configured Linux based applications such as email, web, file, and database servers. Extensive experience with Redhat, Fedora, Suse, Centos, and IPcop distributions.

Provided customer service and training to people of all skill levels. Helped end users gain the understanding and skills required to improve efficiency and create a more enjoyable computing experience.

Deployed and maintained SQL database servers such as MSSQL, MySQL, Pervasive SQL, and Postgres SQL releases also MS Exchange Servers and Redhat Linux web servers.

Setup, upgraded, migrated and administered web servers such as Apache and Internet Information Server for uses in marketing, customer support, sales, and collaboration.

Implemented email servers for many business clients. Effectively designed, built and maintained systems with advanced features such as spam controls, forwarding, and aliasing.

PROFESSIONAL EXPERIENCE

Information Technology Specialist   North County Computers   1994-2003

Installed, maintained and repaired computer systems for small and medium sized businesses. Solved customer's hardware and software problems. Trained customers in use of software. Evaluated needs and preferences for new and upgraded business networks, servers, workstations, broadband internet connections, and VPNs, both wireless and wired Ethernet networks. Approximately 50% of work was done at customer's site.

Network Engineer   Excelsior Computer Solutions LLC   2003-2005

Supported Computer Equipment and designed and built networks for primarily healthcare business clients that need HIPAA compliance and very efficient and specific to their needs. I also developed web based applications and servers for other industries. Worked with business class DSL and other WAN technology and integrated into LAN.

Service & Support Representative   Stream/Solectron (HP, H&R Block) 2004

I performed telephone support for Tax software and large workgroup/network laser printers, in a large call center for corporate clients. Troubleshooting and knowledge of known issues with products were major job functions. Helping end users walk through common procedures and maintenance tasks. Developing strategies to make processes easier and applied more effectively.

Cashier/Cook/Janitor   Crossroads Community Church/Café' Dvine   2005-2006

I was praying with a pastor to solve my financial issues I felt lead to go there. After walking in an prophet employee asked me to talk to the assistant manager so I filled out an application and got the job right away. I ran the cash registers and worked in the kitchen awhile, worked as a janitor. I also lead the cook to Christ.

IT Support   Living Hope Church   2006-2007

Repaired computers and upgraded network configurations, helped setup a multicast system to push the services to other campuses. Built a ticketing system to track trouble tickets and create reports. Streamlined configurations on PCs to work better. Helped install wireless wired and fiber optic network upgrades to integrate offices. Started and lead a homeless outreach. Setup projector and lights for a satellite campus.

On line Marketing/Content Management CGI Productions/Cellecast   2007

Did random office work and learn about the internet business and such. Managed a website called Quiz4Cash.com and learned to market it and get it going.
Worked with a MMS style CMS to manage audio content for the Lou Dobbs radio show and others like Dave Graveline to serve Radio content using VOIP to phones on demand.

Network Technician   CSD Consultants Inc.   2007-2008

Repaired configured and maintained Microsoft based computer networks for small businesses mostly around MS Windows Small Business Server 2003 and Windows XP workstations. A baseball style organization but not suitable for singles.

EDUCATION

Graduating Class	Battle Ground High School	1997
Computer Support Technician Certification	Brain Bench Certifications	2000
Network Technician Certification	Brain Bench Certifications	2000
General Studies/Computer Science	Clark College	200x

(I did enroll but no degree due to curriculum being obsolete, I did not set foot in the classroom. Its all on Google anyways, I recommend online school for non-hands on.)
